

Walton Hall Academy : Long Term Planning

SUBJECT	Geography	CLASS	Year 9	ACADEMIC YEAR	2016 - 17
---------	-----------	-------	--------	---------------	-----------

Main Aims

To know what GIS is and to understand how and why it is used
 To introduce students to Russia and it's main physical features.
 Pupils to be able to identify features created by glaciers and rivers and to understand how they are formed.
 To know what is meant by population and how and why it can change
 Pupils know what Asia is and where it is located
 Look at the diversity and density of population across Asia
 Pupils to compare two regions in China – Chongqing (high population density) and Tibet (Low population density)

<u>Half Term 1</u>		<u>Half Term 2</u>
<u>AUTUMN</u>	Russia – regions and roles	The Frozen North and GIS
<u>SPRING</u>	Glacial landscapes	River landscapes
<u>SUMMER</u>	Population	Asia (Case Study of Southwest China)
